MPH UNITED EMPTY IBC RETURN PROGRAM

Terms of Use

IBC's last containing a hazardous material (**IBC's labeled with a UN Number and diamond label**) must be "drip dry," and material/residue free. If the valve can be opened and container tilted and product come out, the IBC is not empty. IBC's must have all proper labels in accordance with applicable US D.O.T. regulations. D.O.T. 49 CFR 173.29 states all IBC's must have all openings properly closed. Be sure to close valves and tighten all lids and bung plugs.

All IBC's received with excess hazardous material residue will be rejected and returned to the shipper at the shipper's expense. All IBC's received with excess non-hazardous material will be charged a \$25.00 per gallon disposal fee that is to be paid immediately.

All IBC's must be reusable, otherwise a freight and IBC disposal fee will be charged. Useable IBCs have a intact and non-crushed metal or plastic pallet base (**no wood pallets accepted**) and non-bent corrosion free metal framed cage.

IBC's with "P" Listed or products on EPA's List of Lists must be triple rinsed, labels removed and marked triple rinsed.
